HealthCare Information Management, Inc. (HCIM) Continues Participation in TriZetto's Certified Service Partner Program

WALNUT CREEK, Calif. – August 19, 2009 – HealthCare Information Management, Inc. (HCIM), a nationally recognized and certified managed care information technology consulting services and software firm, announced today that it has renewed its partnership with The TriZetto Group, Inc. in TriZetto's Certified Service Partner Program (CSPP). The CSPP is an innovative outcomes-driven program that trains and certifies business partners in best-practice implementations and use of TriZetto's QNXT™, FACETS®, CareAdvance Enterprise® and NetworX Suite® systems. HCIM is currently TriZetto-certified on the QNXT products.

"HCIM is thrilled to renew its partnership with TriZetto's Certified Service Partner Program," said Jeffrey M. Hall, Sr. Vice President and Group Director of Consulting Services at HCIM. Mr. Hall observed that participation in TriZetto's CSPP continues HCIM's successful relationship with TriZetto. "Our continued partnership with TriZetto allows HCIM to uphold our core corporate philosophy of providing only trained and certified consulting resources who possess practical managed care knowledge and claims operations experience, coupled with the high-quality standards and best practices that TriZetto clients have come to expect."

"In the highly competitive market of healthcare consulting, a consultant that achieves TriZetto's professional certification has demonstrated that it possesses the highest measurable level of application knowledge required to properly implement and configure TriZetto's core systems and related products," said Sam Kellerhals, Vice President, Consulting Services, at TriZetto. "We encourage all of our customers to only use TriZetto-certified consultants to ensure they receive current, complete and accurate TriZetto product knowledge."

HCIM's Hall further explains that the company will continue to provide its consulting staff with the necessary and requisite ongoing education demanded by today's healthcare payers and administrators. Hall added, "As trusted advisors to the payer industry, an HCIM colleague who earns and maintains TriZetto's professional certification clearly differentiates his or her knowledge and skill set from the hundreds of other staffing and consulting firm consultants who may only possess limited payer system knowledge and experience."

About HCIM

Incorporated in July 2000, HCIM delivers technology solutions and consulting services to the managed care/payer industry. HCIM's Certified Service Partner consultants are trained and certified in successfully implementing the latest technologies and versions of the industry's leading managed care core transaction systems. HCIM's trained professional consultants offer payer software application implementation services such as database development, database analysis, custom report development, custom software development, testing, and the interface and integration of third party applications. HCIM's consultants also offer operational consulting services, including workflow analysis, organizational review, business process reengineering, realignment of resources, training, conversions, system configuration, and business rules configuration. HCIM's veteran consultants are well equipped to help clients achieve optimal efficiency in such areas as claims processing, utilization management, HIPAA compliancy, and EDI. For more information about HCIM's products and services, call 888-454-0202 or visit www.hcim.com.

About TriZetto

Founded in 1997, TriZetto is the leading privately held healthcare information technology company to the healthcare payer industry. With its technology touching half of the U.S. insured population, TriZetto is Powering Integrated Healthcare Management™, the systematic application of processes and shared information to optimize the coordination of benefits and care for the healthcare consumer. The company's offerings include enterprise and component software, hosting, outsourcing services and consulting that help payers implement and optimize their operations and minimize the risk of bringing new products to market that drive competitive differentiation.
